Poseidon Z *Plus* SMART KEYBOARD

POSEIDON Z SERIES STORY

- ◎ We aim to change the current market by offering a full-featured yet budget friendly fully back-lit mechanical keyboard for gamers – something that could get a first time mechanical keyboard user to come on board. However just because a gaming mechanical keyboard is “budget friendly” does not mean it has to be poorly made, the POSEIDON Z Illuminated can also satisfy the mechanical keyboard enthusiast.
- ◎ Tt eSPORTS spent two years testing various mechanical switches with its engineers and professional gamers. And ultimately, we found the right one- with White Ra, Team DK, ROOT Gaming and our keyboard engineers all agreeing unanimously. We now bring to you the POSEIDON Z Series of keyboards, with Tt eSPORTS certified mechanical blue/brown switches.
- ◎ The testing process for these mechanical switches was an arduous one, but these switches passed and we believe in them so much that Tt eSPORTS is now offering the world's first 5 year warranty for a mechanical gaming keyboard.

BRING QUANTIFIED SELF TO GAMING

Tt eSPORTS+ Community

The Tt eSPORTS+ Community not only provides users a platform to serve as cloud storage for their logs and analyze their stats, but also to compare their usage with pro players & challenge their friends to mouse usage competitions.

Map out the top 10 hotkeys clicked by users for comparison with pro players. Allow competition with friends that brings quantified self to the eSports realm.

Offers a way to track user's mouse usage stats, store logs, break down analysis by time, social media sharing, and gamification to make things fun.

Record and post your gameplay performance and share your location with friends, fans and generations to come on the community and social networks.
