MACRO KEYS

CHALLENGE IS THE GAME WWW.TTESPORTS.COM

T1 to T12 & 8 more extra keys in the standard key area can be assigned as T Key, Single Key, Default setting or Launch Program function.

You can set status to your liking as Normal or Game mode.

Provides three game profiles, each profile offers up to 20 macro keys from T1 to T20 (T1 to T12 is fixed; T13 to T20 is unfixed.)

- ⊙ Reset the preset profile configuration
- ⊙ Register your keyboard or warranty
- ⊙ Direct gamers for QIG and GUI setup

Gamers can program & manage their personalized key contents via keyboard.

Preview the status of your key assignment.

- ⊙ T Key: You can select a Macro setting from the drop list to assign a T Key
- ⊙ Single Key: You can assign any key as another key definition within the standard key area
- ⊙ Default: It will bring back the T Key & Single key to default setting
- ⊙ Launch Prgm: User can setup LAUNCH function as game execution or other applications

ISS (Instant Shift System) advanced macro key shifting function allows Gamer to reach all 60 macro keys within one profile.

3 individual white illumination sections for 4 levels and pause-break lighting design.

Tt Switch Story

- © Tt eSPORTS spent two years testing various mechanical switches with its engineers and professional gamers. And eventually, we found the right one- with White Ra, Team DK, ROOT Gaming and our keyboard engineers all agreeing unanimously. We now bring to you the POSEIDON Z Series of keyboards, with Tt eSPORTS certified mechanical blue/brown switches.
- © The testing process for these mechanical switches was an arduous one, but these switches passed and we believe in them so much that Tt eSPORTS is now offering the world's first 5 year warranty for a mechanical gaming keyboard.

5 year
warranty

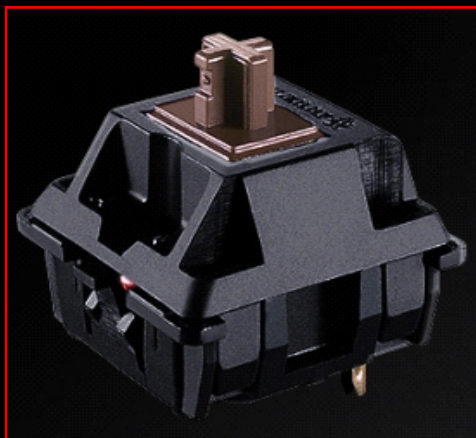

Tt certified mechanical switch

The Tt eSPORTS Certified Mechanical BLUE and BROWN switches are built for speed and durability. With the BLUEs offering a pronounced tactile feel and audible click feedback, and the BROWNS offering a more subtle balance between tactile feedback and actuation force, while remaining much quieter than the BLUEs. These switches were specially chosen by our pro-gamers and engineers, and we believe in them so much that we're offering the world's first 5 year warranty on a mechanical gaming keyboard.

Poseidon Z
FORGED

Blue LED ILLUMINATION

The POSEIDON Z Forged is fully back-lit with blue LEDs. The back lighting system has adjustable brightness, pulse lighting pattern, and can be turned off too.

Profile Indicator LED

Differentiates via color, to allow the user to tell which profile they are on.

Per-key illumination

Each key is laser engraved, to allow the letters and symbols to light up blue. Using this method, the lettering also will not fade over time.

5 Lighting Zones

5 different regional lighting combinations, to match whichever game you're playing.

USB SOUND CARD AND HUB

The DAC in the soundcard operates at a sampling rate of 48kHz/8kHz and the 16-bit PCM ADC operates at 8/16kHz for the Microphone input. For the DAC, the soundcard has a digital programmable gain amplifier. The gain range is from -32dB to +6dB. For the ADC input, the digital gain range is from 0dB to 19.5dB.
